Mental Health and Well-being Policy

2018/19

Mental Health and Well-being Policy: Stanstead Nursery and Primary School

Last Updated- Sep 2018

Policy Statement

Mental health is a state of well-being in which every individual realises his or her own potential, can cope with the normal stresses of life, can work productively and fruitfully, and is able to make a contribution to her or his community. (World Health Organization)

At our school, we aim to promote positive mental health for every member of our staff and all of our pupils. We pursue this aim using both whole school approaches and targeted approaches aimed at vulnerable pupils. By promoting positive mental health, we aim to recognise and respond to mental ill health, and promote a safe and stable environment for pupils affected- directly or indirectly- by mental ill health.

This policy should be read in conjunction with our Safeguarding for all pupils and our SEND policy where a pupil has an identified special educational need.

Lead Members of Staff

Whilst all staff have a responsibility to promote the mental health of pupils; staff with a specific, relevant remit include:

- Patricia Vladev – Designated Safeguarding Lead (DSL) for child protection/SENCO
- Teresa Terzza –Designated Safeguarding Lead (DSL) / Children’s Welfare Officer/SENCO
- Louise Nicolls - Mental Health Lead / R.E. lead
- Deborah Saunders - Safeguarding Governor
- Teresa Terzza- Mental Health Governor

Any member of staff who is concerned about the mental health or wellbeing of a pupil should speak to the Designated Safeguarding Lead in the first instance. If there is a fear that the pupil is in danger of immediate harm, the normal child protection procedures must be followed. If the pupil presents a medical emergency then the normal procedures for medical emergencies should be followed, including alerting the first aid staff and contacting the emergency services if necessary.

Where a referral to CAMHS is appropriate, this will be led and managed by Teresa Terzza, SENCO.

Teaching about Mental Health

The skills, knowledge and understanding needed by our pupils to keep themselves and others physically and mentally healthy and safe are included as part of our developmental PSHE curriculum.

The specific content of lessons will be determined by the specific needs of the cohort we’re teaching but there will always be an emphasis on enabling pupils to develop the skills, knowledge, understanding, language and confidence to seek help, as needed, for themselves or others.

We will follow the [PSHE Association Guidance](#)¹ to ensure that we teach mental health and emotional wellbeing issues in a safe and sensitive manner which helps rather than harms.

Year 2 children will follow the 'Zippy's Friends' and in Year 3 the 'Apple's Friends' programmes. Zippy will be taught to all Year 2 pupils and Apple's Friends will be taught to all Year 3 pupils. These are programmes which have been based on extensive research and have been endorsed by the World Health Organisation and national governments. It has been developed to encourage good mental health for children-for life. The programmes teach children how to cope with everyday difficulties, to identify and talk about their feelings and to explore ways of dealing with them. It also encourages children to help other people with their problems. Zippy's Friends and Apple's Friends will only be taught by trained members of staff to ensure the quality and consistency of the sessions.

Signposting

We will ensure that staff, pupils and parents are aware of sources of support within school and in the local community. What support is available within our school and local community, who it is aimed at and how to access it is outlined in Appendix C.

We will display relevant sources of support in communal areas such as corridors and family rooms and will regularly highlight sources of support to pupils within relevant parts of the curriculum. Whenever we highlight sources of support, we will increase the chance of pupil help-seeking by ensuring pupils understand:

- What help is available
- Who it is aimed at
- How to access it
- Why to access it
- What is likely to happen next

Warning Signs

School staff may become aware of warning signs which indicate a pupil is experiencing mental health or emotional wellbeing issues. These warning signs should **always** be taken seriously and staff observing any of these warning signs should communicate their concerns with Patricia Vladev, our Designated Safeguarding Lead.

Possible warning signs include:

- Physical signs of harm that are repeated or appear non-accidental
- Changes in eating / sleeping habits
- Increased isolation from friends or family, becoming socially withdrawn
- Changes in activity and mood
- Lowering of academic achievement
- Talking or joking about self-harm or suicide
- Expressing feelings of failure, uselessness or loss of hope
- Changes in clothing – e.g. long sleeves in warm weather
- Secretive behaviour
- Skipping PE or getting changed secretly
- Lateness to or absence from school
- Repeated physical pain or nausea with no evident cause

¹ [Teacher Guidance: Preparing to teach about mental health and emotional wellbeing](#)

Managing disclosures

Staff will respond to a disclosure relating to Mental Health or Wellbeing according to the school's Safeguarding policy.

Working with All Parents

Parents are often very welcoming of support and information from the school about supporting their children's emotional and mental health. In order to support parents, we will:

- Highlight sources of information and support about common mental health issues
- Ensure that all parents are aware of who to talk to, and how to get about this, if they have concerns about their own child or a friend of their child
- Make our mental health policy easily accessible to parents
- Share ideas about how parents can support positive mental health in their children
- Keep parents informed about the mental health topics their children are learning about in PSHE and share ideas for extending and exploring this learning at home

Supporting Peers

When a pupil is suffering from mental health issues, it can be a difficult time for their friends. Friends often want to support but do not know how. In order to keep peers safe, we will consider on a case by case basis which friends may need additional support. Support will be provided either in one to one or group settings and will be guided by conversations by the pupil who is suffering and their parents with whom we will discuss:

- What it is helpful for friends to know and what they should not be told
- How friends can best support
- Things friends should avoid doing / saying which may inadvertently cause upset
- Warning signs that their friend should look out for (e.g. signs of relapse)

Additionally, we will want to highlight with peers:

- Where and how to access support for themselves
- Safe sources of further information about their friend's condition
- Healthy ways of coping with the difficult emotions they may be feeling

Training

As a minimum, all staff will receive regular training about recognising and responding to mental health issues as part of their regular child protection training in order to enable them to keep pupils safe. Staff will also consider issues of mental health and wellbeing within staff meetings, INSET days and by accessing wider training as appropriate.

Free, online training is available via the [MindEd learning portal](#)² for staff wishing to know more about a specific issue.

Policy Review

This policy will be reviewed every year. It is next due for review in Oct 2019.

Appendix A: Further information and sources of support about common mental health issues

Prevalence of Mental Health and Emotional Wellbeing Issues³

- 1 in 10 children and young people aged 5 - 16 suffer from a diagnosable mental health disorder - that is around three children in every class.
- Between 1 in every 12 and 1 in 15 children and young people deliberately self-harm.
- There has been a big increase in the number of young people being admitted to hospital because of self-harm. Over the last ten years this figure has increased by 68%.
- More than half of all adults with mental health problems were diagnosed in childhood. Less than half were treated appropriately at the time.
- Nearly 80,000 children and young people suffer from severe depression.
- Over 8,000 children aged under 10 years old suffer from severe depression.
- 3.3% or about 290,000 children and young people have an anxiety disorder.
- 72% of children in care have behavioural or emotional problems - these are some of the most vulnerable people in our society.

Below, we have sign-posted information and guidance about the issues most commonly seen in school-aged children. The links will take you through to the most relevant page of the listed website. Some pages are aimed primarily at parents but they are listed here because they are useful for school staff too.

Support on all of these issues can be accessed via [Young Minds](http://www.youngminds.org.uk) (www.youngminds.org.uk), [Mind](http://www.mind.org.uk) (www.mind.org.uk) and (for e-learning opportunities) [Minded](http://www.minded.org.uk) (www.minded.org.uk).

Self-harm

Self-harm describes any behaviour where a young person causes harm to themselves in order to cope with thoughts, feelings or experiences they are not able to manage in any other way. It most frequently takes the form of cutting, burning or non-lethal overdoses in adolescents, while younger children and young people with special needs are more likely to pick or scratch at wounds, pull out their hair or bang or bruise themselves.

Depression

Ups and downs are a normal part of life for all of us, but for someone who is suffering from depression these ups and downs may be more extreme. Feelings of failure, hopelessness, numbness or sadness may invade their day-to-day life over an extended period of weeks or months, and have a significant impact on their behaviour and ability and motivation to engage in day-to-day activities.

Anxiety, panic attacks and phobias

Anxiety can take many forms in children and young people, and it is something that each of us experiences at low levels as part of normal life. When thoughts of anxiety, fear or panic are repeatedly present over several weeks or months and/or they are beginning to impact on a young person's ability to access or enjoy day-to-day life, intervention is needed.

Obsessions and compulsions

Obsessions describe intrusive thoughts or feelings that enter our minds which are disturbing or upsetting; compulsions are the behaviours we carry out in order to manage those thoughts or feelings. For example, a young person may be constantly worried that their house will burn down if they don't turn off all switches before leaving the house. They may respond to these thoughts by repeatedly checking switches, perhaps returning home several times to do so. Obsessive compulsive disorder (OCD) can take many forms – it is not just about cleaning and checking.

Suicidal feelings

Young people may experience complicated thoughts and feelings about wanting to end their own lives. Some young people never act on these feelings though they may openly discuss and explore them, while other young people die suddenly from suicide apparently out of the blue.

Eating problems

Food, weight and shape may be used as a way of coping with, or communicating about, difficult thoughts, feelings and behaviours that a young person experiences day to day. Some young people develop eating disorders such as anorexia (where food intake is restricted), binge eating disorder and bulimia nervosa (a cycle of bingeing and purging). Other young people, particularly those of primary or preschool age, may develop problematic behaviours around food including refusing to eat in certain situations or with certain people. This can be a way of communicating messages the child does not have the words to convey.

Appendix C: Sources of support at school and in the local community

School Based Support

For pupils

- Bubble Box- A Bubble Box is provided for every classroom for children to write their anything they are worried about in. This is checked daily by the Children’s Welfare Officer who then speaks with any children who have written in.
- ELSA- (Emotional Literacy Support Assistant)- Trained staff whose role is to support children and young people in school to understand and regulate their own emotions whilst also respecting the feelings of those around them.
- Nurture Groups- Nurture groups are run for children with various different needs in order to support their mental health and well-being.
- Zippy and Apple’s Friends Programmes are delivered across Years 2 and 3, by trained members of staff.

For staff

- PAM Assist- Free counselling support and practical advice through the Employee Assistance Programme. It is available 24 hours a day, 365 days a year on 0800 882 4102 or www.pamassist.co.uk.
- Buddy system amongst all staff members to ensure confidential support and advice can be given when necessary.

Local Support

- Wellness in Mind

wellnessinmind.org

Telephone: 0800 561 0073

Wellness in Mind provides information, advice and support for anyone in Nottingham experiencing issues with their mental wellbeing. The service will help people understand mental health issues, and connect people to the services which may best support them.
